

## **PUBLICATION ETHICS AND MALPRACTICE STATEMENT**

International Journal of Management Studies (IJMS) is double blind peer reviewed journal. It is necessary to agree upon standards of ethical behaviour for all stakeholders involved in the publishing i.e. the author, the journal editor, the peer reviewer and the publisher. The ethics statements are based on the **Committee on Publication Ethics (COPE)** Best Practices Guidelines for Journal Editors.

### **DUTIES OF EDITORS:**

#### **Decision on the Publication of Article**

The Chief Editor and the Associate Editor responsible for deciding which of the articles accepted for publication after undergoing double blind peer review should be published. The Chief Editor and the Associate Editor may be guided by the policies of the journal's Editorial Board and subjected to such legal requirements regarding libel, copyright infringement and plagiarism. The editor may confer with other editors or reviewers in making this decision.

#### **Fair play**

An Editor shall evaluate the manuscript(s) solely on their intellectual content without regard to race, gender, sexual orientation, religious belief, ethnic origin, citizenship, or political philosophy of the authors.

#### **Confidentiality**

The Chief Editor, the Associate Editor and any editorial staff must not disclose any information about a submitted manuscript to anyone other than the corresponding author, reviewers, potential reviewers, other editorial advisers, and the publisher.

## **Disclosure and Conflicts of Interest**

Unpublished materials disclosed in a submitted manuscript must not be used by anyone who has a view of the manuscript (while handling it) in his or her own research without the express written consent of the author.

## **DUTIES OF REVIEWERS**

### **Contribution to Editorial Decisions**

Peer review assists the editor in making editorial decisions and through the editorial communications with the author may also assist the author in improving the paper.

### **Promptness**

Any selected referee who feels unqualified to review the assigned manuscript or unable to provide a prompt review should notify the Chief Editor and the Associate Editor and excuse himself/herself from the review process.

### **Confidentiality**

Manuscripts received for review must be treated as confidential documents. They must not be shown to, or discussed with, others except as authorized by the Chief Editor and the Associate Editor.

### **Standards of Objectivity**

Reviews should be conducted objectively. There shall be no personal criticism of the author. Reviewers should express their views clearly with supporting arguments.

## **Acknowledgment of Sources**

Reviewers should identify relevant published work that has not been cited by the authors. Any statement that had been previously reported elsewhere should be accompanied by the relevant citation. A reviewer should also call to the Chief Editor/Associate Editor's attention any substantial similarity or overlap between the manuscript under consideration and any other published paper of which they have personal knowledge.

## **Disclosure and Conflict of Interest:**

Privileged information or ideas obtained through peer review must be kept confidential and not used for personal advantage. Reviewers should not review manuscripts in which they have conflicts of interest resulting from competitive, collaborative, or other relationships or connections with any of the authors, companies, or institutions connected to the papers.

## **DUTIES OF AUTHORS**

### **Reporting Standards**

Authors of reports of original research should present an accurate account of the work performed as well as an objective discussion of its significance. Underlying data should be represented accurately in the paper. A paper should contain sufficient detail and references to permit others to replicate the work. Fraudulent or knowingly inaccurate statements constitute unethical behaviour and are unacceptable.

### **Data Access and Retention**

Authors may be asked to provide the raw data in connection with a paper for editorial review, and should be prepared to provide public access to such, if practicable, and should in any event, be prepared to retain such data for a reasonable time after publication.

### **Originality and Plagiarism**

Authors should ensure that they have written entirely original works, and if the authors have used the work and/or words of others, this must be appropriately cited or quoted.

### **Multiple Publications**

An author should not in general publish manuscripts describing essentially the same research in more than one journal or primary publication. Submitting the same manuscript to more than one journal concurrently constitutes unethical publishing behaviour and is unacceptable.

### **Duplicate Submission**

Manuscripts that are found to have been published elsewhere, or to be under review elsewhere, will incur duplicate submission/publication sanctions. If authors have used their own previously published work, or work that is currently under review, as the basis for a submitted manuscript, they are required to cite the previous work and indicate how their submitted manuscript offers novel contributions beyond those of the previous work.

### **Acknowledgment of Sources**

Proper acknowledgment of the work of others must always be given. Authors should cite publications that have been influential in determining the nature of the reported work.

## **Authorship of the Paper**

Authorship should be limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported study. All those who have made significant contributions should be listed as co-authors. Where there are others who have participated in certain substantive aspects of the research project, they should be acknowledged or listed as contributors.

The corresponding author should ensure that all appropriate co-authors and no inappropriate co-authors are included on the paper, and that all co-authors have seen and approved the final version of the paper and have agreed to its submission for publication.

## **Acknowledgment of Funding Sources**

Sources of funding for the research reported in the article should be duly acknowledged at the end of the article.

## **Disclosure and Conflicts of Interest**

All authors should disclose in their manuscript any financial or other substantive conflict of interest that might be construed to influence the results or interpretation of their manuscript. All sources of financial support for the project should be disclosed.

## **Fundamental Errors in Published Works**

When an author discovers a significant error or inaccuracy in his/her own published work, it is the author's obligation to promptly notify the Chief Editor/Associate Editor and cooperate with the editors to retract or correct the paper.
